

Daniel J. Brown

To the FCC.

To whom it may concern,

This is in regards to the FCC replacing local programming of K-Love radio with a LPFM local station.

K-Love is the most in touch radio station that I have ever listened to. They play all of our favorites, local news, and are easily accessible over the inter net. My 5 year old granddaughter loves this station and my wife and I listen to K-Love in our cars as we drive and as we do yard and house work. We looked long and hard for a radio station like this and it would be a real loss to remove it's positive influence from the airwaves and from the lives of people in this community or anywhere for that matter.

This radio station has been and is still a consistent positive influence to the community. It provides clean quality programming that is encouraging to all age groups and can be relied on to continue to do so without worrying about detrimental insertions by special interest groups with alternative agendas.

K-Love is only interested in serving the community wherever it airs and is always open to suggestions and interaction from the communities it serves. It has excellent moral foundations that are consistent with the betterment of any community.

Please do not take this station away from my community with this or any new ruling that would do so.

Sincerely, Daniel J. Brown
